**New Holland
 Natural Fiber Twine --**

Your Natural Choice For Round Or Square Balers

- Uniform thickness-
no thicks or thins
- Entirely biodegradable
- Treated for mildew
resistance
- Consistent tensile/
knot strength

■ A bale of New Holland natural twine always contains the exact footage shown on the label. This isn't the case with other brands. For instance, a bale of twine labeled 7,200 feet by another manufacturer may actually contain only 6,800 feet. This kind of inaccuracy could make a big difference in your production costs. And, in your profits.

NEW HOLLAND NATURAL FIBER TWINE

Feet Per Bale	Knot Strength	Gross Weight (Lbs.)	End Use Application	Sale Price!
7,200*	160	40	Square Bale	\$20.79 per bale
9,000*	130	40	Square Bale	\$20.79 per bale
10,000*	115	40	Square Bale	\$20.79 per bale
16,000*	180	40	Round Bale	\$22.80 per bale

(tensile strength)

What's the importance of the terms tensile strength and knot strength?

Tensile strength refers to the amount of resistance twine provides before breaking. But it's also it's also important to consider a twine's strength. That's because when twine is tied into a knot, its strength is reduced by almost 60%.

New Holland natural twine has enhanced knot strength because we use only specially selected high tensile strength fibers to provide you with the best possible knot strength. New Holland twine comes from Brazilian plantations where the leaves are hand selected and cut from the hardy sisal plant. We harvest only the mature leaves at the bottom of the plant because of their longer, and much stronger, fibers. This kind of careful attention continues through the entire twine-producing process. In fact, there are a series of progressive quality controls through the various production stages to ensure twine uniformity and high tensile strength.
