

Invitation For Dairy Of Distinction Winners To Meet At Ag Progress Days

June 28, 1996

Dear Dairy of Distinction Farms and Friends:

Please join with us to honor and share fellowship, with all of the Pennsylvania Dairy of Distinction farmers and families. A reception will be held on Tuesday, August 13, 1996, at Ag Progress Days. It will start at 2:00 p.m., in the Ag Progress Special Events Building. You will be greeted by Pennsylvania's Dairy Princesses, serving cheese and fruit.

The large color farm photos of the 1996 Dairy of Distinction winners are provided by Lancaster Farmer, and will be on display. They will be presented by Everett Newswanger, Editor of Lancaster Farmer, so that each winner can take their photo home. A group photo will be taken of all the Dairy of Distinction winners.

I am looking forward to seeing you there.

Sincerely,

Paul Nichols

WANTED

DAIRY OF DISTINCTION HAY CROP

YOU SHOULD CONSIDER
ROUND BALE SILAGE!

- High quality forage.
- Harvest when crop is ready
- Reduces reliance on drying time.
- Lower field losses.
- Different grades of hay can be kept separate.
- Low capital investment compared to conventional method.
- Low horsepower and fuel requirement
- Possibility of extra cut, earlier and later in the season.
- Bales can be sold as cash crop.
- Better herd health with long stem fiber.

Talk with a farmer who's doing it,
he'll give you more reasons!

TANCO BALE WRAPPER

TANCO... The Wrapper That Wraps Bales Others Won't
GIVES YOU HAY OF DISTINCTION

- Five (5) points of support on turntable: Four heavy duty rollers add stability and support to the perimeter of the turntable in addition to the main central shaft. This allows Tanco wrappers to safely wrap the heaviest silage bales on rough or uneven ground.
- Single solid belt on turntable: The single belt enables Tanco wrappers to effectively wrap misshapen or soggy bales providing a positive surface for bale rotation.
- Adjustable extendible axle: On trailed models the extendible axle provides a wide, stable wheel base when loading bales. Eliminates the need for counterweights.
- Top rollers on turntable: Extra rollers provide security to keep bales in place when wrapping at high RPM's (25) or on uneven terrain.
- Unloading ramp on trailed models: The ramp allows bales to be unloaded gently. When a wrapped bale falls hard it can "burp". Once it "burps" the bale does not reseal. The ramp gives a smooth transition between the ground and turntable.
- Optional "High Rise" axle kit for soft ground conditions.
- Models available to fit every individual need, including machines to wrap big square bales. Tanco was first to build a large square bale wrapper, & continues

to produce advancements in bale wrapping technology.

- Positive bale positioning: While being wrapped, bales are rotated the exact distance required to obtain optimum coverage.
- Durability: Tanco's subframe is one of the heaviest of any machines available in North America. The low profile design keeps silage bales closer to the ground with a low center of gravity for stability. Tanco's features are the result of years of experience and input from hundreds of individual, and commercial users.
- Price: From a basic 3 point Model AW250, to the trailed Model AW550 with automatic cut & start, bale and batch counter, and tractor seat controls, Tanco prices are very competitive. Pay less for more features and durability than any other bale wrapper on the market.
