

INTRODUCING THE ONLY REFRIGERATION UNIT DESIGNED TO WORK UNDER THESE CONDITIONS.

To cool milk, you need a unit that's built for the task.

The new Energy Star™ is a true *refrigeration* unit—rather than the air-conditioning compressor you may currently be using. Energy Star has a Copeland® scroll compressor that is specifically designed to handle the large temperature changes required to cool milk. And since it's made for milk, Energy Star is the most energy-efficient unit available for the dairy industry.

The Mueller® Energy Star comes with a single variable-speed fan and sub-cooling coil for greater efficiency. If you would like to know more, call the dealer nearest you.

Energy Star. The industry's most efficient milk refrigeration unit.
