- Trillion 5 Ft., 3 Pt., Seeder.....\$1,200
- 6 Ft. 3 Pt. Scraper Blade.....\$305

## Every grain opened up

The high quality of corn forage produced by the JAGUAR is derived from the CLAAS corn cracker. Two saw toothed rollers run at different speeds with 20% difference open up virtually every kernel and this means good quality silage which is easily digested. This makes for highest energy transfer for r higher milk and meat yields.

The rollers are subject to wear and tear, so the CLAAS corn cracker features removable outer sleeves. The shafts, drive pulley and bearing are all reused, thus reducing maintenance costs. Foreign bodies pass through thanks to a spring loaded mechanism.

The 7.7" diameter of the corn cracker rollers is exceptionally large. The speed differential intensifies the grinding effect for effective opening of the kernels.

The degree of corn cracker intensity is adjustable to take account of differing dry matter content. This is done mechanically. An optional electrical adjustment is available.

Since the corn cracker stays on the machine, the changeover from corn to grass can always with a minimum of preparation. This is a help when grass and corn are being harvested at the same time. The area around the corn cracker ahead of the cooling system is very large, enabling ease of access to parts you wouldn't otherwise be able to reach.

### Looking for a better combine?

**Look to Massey Ferguson first.**

Ever since Massey Ferguson introduced the very first self-propelled combine, they've been the preferred choice of some of the world's most demanding customers

It's a legacy of which we're extremely proud. And it's an obligation we take very seriously. The new MF 8450 and 8460 combines are a proud addition to this Massey Ferguson tradition for quality, performance and reliability.

Plus they offer exciting new features that demonstrate the continuing Massey Ferguson commitment to providing you with the best value in combines.
