THE BEST JUST GOT BETTER!

Better Performance. Gehl Scavenger®, the original V-tank spreader, has built a well-deserved reputation for delivering unmatched performance in a wide variety of materials. The new Scavenger takes that performance to the next level with even better spreading patterns in the toughest heavily loaded manure.

Increased Durability. Not only has the new Scavenger been designed to outperform all other V-tank spreaders, but the main drive system components have been beefed-up for extra durability and increased dependability.

Why is Scavenger the Best? One big reason is the unique new round-core auger. This auger features segmented paddles grouped in a spiral pattern. This flying configuration delivers more material to the discharge expeller in less time for faster unloading. The paddles are precisely positioned to deliver more uniform feeding to the discharge expeller. This exceptional design breaks up and blends all types of manure.

The auger is hydraulically powered both up and down (unlike competitive units that use springs, gravity or fixed augers). This design provides more control to chop through bridged material or power down through heavy loads.

Outstanding Application Control. Gehl's proven Veriflo discharge system has been made even better. It's 33 percent wider on the Model 1315. On all new models the expeller assembly has been significantly strengthened. New square-tooth expeller paddles spread smoothly and evenly. You choose the rate you want, from heavy spring-time spreading to light top-dressing. With Scavenger you have complete control right at your fingertips.

Scavenger is Simply Better. The Gehl Scavenger is a simple spreader. It's solid and durable with sealed, welded tank construction and a full length channel steel sub-frame. Every Scavenger is built to deliver top performance year after year.

Your Gehl Dealer can show you why the new Scavenger V-tank spreader is still the best.

GEHL New Swing Frame Mower Conditioners

Maneuverability and capacity of a self-propelled...at a pull-type price

Gehl center pivot swing frame mower conditioners deliver high volume cutting and conditioning with outstanding maneuverability. Two new models are available: the 2245 with 12.3 cutting width.

These machines pivot at the center of the frame for easy header positioning. So you can cut back and forth across the field from either the right or left side of the tractor or tow the unit directly behind the tractor for road travel.

Easily adjustable guard angle
The guard angle adjusts from 6 to 14 degrees to match any field condition.

Three point flotation support provides both lateral and vertical flotation. The header is carried on two outside arms and pivots on a center link for clean fast cutting in uneven fields. This fast reacting system provides outstanding cutterbar protection from rocks and other field obstructions. It's easily adjustable for varying field conditions.

Self-contained hydraulic system powers the cutterbar reel, auger and conditioning rolls. Gehl's high capacity hydraulic pump is powered by the tractor PTO.

When it comes to cutting and conditioning, these swing frames can't be beat. Gehl's reliable, simplified drive system powers the sicklebar for clean cutting. The crop is gently swept to the augers and delivered to the wide 109-inch conditioning rolls for the thorough, gentle conditioning needed for quick drying and maximum nutrient retention.

If you're ready to cut hay in a big way, see your Gehl dealer today.

One Super Deal On The 12'3" Cut Mower Conditioner

Model 2245 Ready to Mow At Binkley & Hurst Today!

The powerful hydraulic motor transmits power through an extremely simple drive system.

Simple, powerful sickle drive. A hydraulic motor drives the sickle through a simple gearbox and V belt system with fewer moving parts. The single swaybar delivers more power at the sickle head. 1500 strokes per minute means smooth cutting at higher ground speeds.

109-inch wide machined intermeshing conditioning rolls provide thorough, uniform conditioning for fast drying and maximum nutrient retention.

Available For Immediate Delivery at Binkley & Hurst Inc.

Most Mix-All owners will never buy another.

Model MX125 and Model MX170

In fact, you'd probably have a hard time convincing Gehl Mix-All owners to even look at anything else. And why should they?

The Mix-All's big 21-inch wide hammermill features 66 reversible thin hammers that cut, rather than pound the feed to deliver a more consistent grind and ensure uniform mixing for a better feed conversion rate. Gehl's self-contained hydraulic system is designed-in, not added on. It provides the precision of infinitely variable in-feed attachment control to match tractor power for greater grinding capacity. Plus you get fast, smooth, trouble-free unloading with greater reliability. And a wide variety of options and attachments lets you customize your Mix-All to fit any operation.

Your Best Forage Box Value

Gehl's new BU980 Self-unloading forage box has been redesigned for improved performance and durability.

- Features include:
- True variable-speed drive for infinite unloading speeds.
 - Single lever control.
 - Improved beater design.
 - Stronger drive chain and reinforced roof.
 - Standard highway light package.
 - Optional folding 18-inch conveyor extension.

Power Efficient Heavy Duty Gehl 1065 Chopper

2 or 3 Row Corn Head Equipped The Way You Need It!

Splashguards and side rails increase the heaped bushel rating by 14% while protecting spreader sides and keeping sloppy loads off the roads.

Durable Galvanized steel sides are corrosion resistant for long life. One-piece seamless construction won't catch material or leak.

Heavy-duty gear boxes; one a 90 degree beater drive, the other a two-speed worm box with bronze gear and steel worm, provide efficient power transmission, smoother operation and long life. They're protected by a polyethylene shield that won't rust or dent.

Hydraulic apron drive option provides infinite unloading speeds to match any load, ground speed or application rate requirements. It's available on the four largest models. Conveyor slats are made from 1/4" high-strength rail-steel.

Full length, sturdy A-frame hitch (7-gauge steel on MS135/175/250 and 3/16" steel on MS325/425) ties directly to the axle for extra strength and durability. Because the load is carried and not pulled, the weight of the load and its associated stress is more evenly distributed across a broader base.

Binkley & Hurst Bros. Inc. has this Quality Gehl Mixer Feeder On Our Lot Ready For Delivery!

Gehl TMR Mixer Feeders Are #1

In Stock Ready For Delivery

GEHL

Nothing can maximize the return on investment in your dairy or beef feeding operation like a Total Mixed Ration (TMR) feeding system. And nothing makes TMR work better than a Gehl mixer feeder. Here's why:

- Better Mixing Action** — Unique four-auger design creates a double figure-8 mixing pattern for fast and complete mixing of all feed ingredients.
- Energy Efficient** — Planetary drive system requires less horsepower.
- Built To Last** — Patented star couplers absorb shock loads by allowing the bottom augers to flex, providing long service life.
- Six Sizes** — From 150 to 500 cubic feet mixing capacities.
- Three Styles** — Trailer type, stationary and truck-mounted units to fit your operation.
