VAN DALE

WASTE HANDLERS

LAGOON PUMPS

Van Dale sets a new standard for quality, performance and ease of operation with its advanced line of Series 5000 Lagoon Pumps. Each model is built with the strength, power and reliability to completely agitate any size liquid manure lagoon fast. The Series 5000 Lagoon Pumps are equipped with features that minimize the hassle and maximize the pump's operating life. And your choice of three models lets you operate in everything from shallow straight wall pits to the deepest sloped wall lagoons.

SPREADER TANKS

Van Dale's new line of Spreader Tanks is designed to spread better, service easier and last longer than any other competitive spreaders.

Van Dale's superior strength starts with 1/4" steel plate construction on tank shell, domed heads and baffles. Tank seams overlap and are fully welded for extra durability. Each unit is completely sand-blasted followed by a coat of rust-inhibiting primer. It's then finished with two coats of chemical resistant paint. The final result! A line of Spreader Tanks built to last.

In fact, we're so certain our tanks are built to last, we back them up with a comprehensive 10-year pro-rated tank body warranty* and a full 5-year undercarriage warranty.*

*Warranty applies to original purchaser, provided the tank is used for non-commercial animal waste handling only. See dealer for details.
