Retire Your
Current Spreaders!

8000 SERIES
PPC TWIN SLINGERS
 Revolutionizes The V
 Spreader Concept

The 8000 Series ProTwin Slingers can handle a wider range of materials than any other spreader. If you have pen pack, sticky feed lot or slurry-type material that needs to be spread fast... and spread evenly, you need the Knight ProTwin Slinger.

The expeller on all ProTwin models features 15 forged steel hammers mounted on a 2 1/2" shaft. The hammers pivot on 1/2" bolts with nylon anti-seize type bushings that allow free movement. The expeller rotates at over 800 RPM allowing each eight pound hammer to swing down into the material peeling it off and singeing it underhand in a fine spread pattern with no clumps. The 3" wide free swinging hammers absorb shock and tolerate most foreign objects. Each hammer is faced with a work hardening manganese steel wear plate for longer life and low cost replacement. The adjustable shroud allows easy hammer clearance setting for optimum spread pattern width. This proven hammer expeller design enables

fine spreading control and material calibration through the combination of the hydraulic door opening and ground speed.

The right auger is driven at the rear and is shear pin protected. Bearings, chains and sprockets are easily accessible for routine maintenance.

*Shields removed for illustration only. Do not operate without shields in place and functioning.
