

High Quality Knight Spreaders Come From Binkley & Hurst Bros., Inc.

The expeller on all ProTwin models features 15 forged steel hammers mounted on a 2 1/2" shaft. The hammers pivot on 3/4" bolts with nylon anti-seize type bushings that allow free movement. The expeller rotates at over 800 RPM allowing each eight pound hammer to swing down into the material peeling it off and slinging it underhand in a fine spread pattern with no clumps. The 3 wide free swinging hammers absorb shock and tolerate most foreign objects. Each hammer is faced with a work hardening manganese steel wear plate for longer life and low cost replacement. The adjustable shroud allows easy hammer clearance setting for optimum spread pattern width. This proven hammer expeller design enables fine spreading control and material calibration through the combination of the hydraulic door opening and ground speed.

The right auger is driven at the rear and is shear pin protected. Bearings, chains and sprockets are easily accessible for routine maintenance.

**Shields removed for illustration only. Do not operate without shields in place and functioning.*

Added improvements provide the versatility to incorporate chemicals, manage residue and control weeds.

- Precision depth control across the entire working width for uniform seedbed preparation.
- Better penetration with less weight cuts your fuel costs.
- Shallow concavity blades reduce compaction.
- Open frame design allows residue to pass through machine smoothly and quickly.
- 19 to 33-foot versions available in standard flex wing or cushion gang versions.

You can count on us for quality tillage equipment, genuine Case IH parts, professional service support and flexible financing.
