SUPERFLOW FERTILIZER SPREADERS

Vicon SUPERFLOW SEEDER

Spreaders are the most accurate broadcast spreaders in the world. The unique pendulum action keeps the spread pattern close to the rear of the machine while at the same time providing a symmetrical pattern on both sides.

The pattern allows "back and forth" as well as "around and around" operation. The "truncated" pattern offsets inaccurate overlap problems, eliminating streaking.

Seeder spreaders are easily calibrated for extremely accurate performance.

Rust free polyester hoppers, "DURA-COAT" enamel on painted components with stainless steel metering plates, precision adjustments, and a variety of spouts for a multitude of applications have earned **Vicon** Superflow seeder spreaders a world-wide reputation as the premier broadcast spreader.

Versatile

Vicon spreaders band material in vineyards, orchards and nurseries, as well as spread lime, and salt and sand for winter use.
