Beitzel Spraying is now distributing:

SAFECIDE® BRAND IC

For the control of darkling beetles, hide beetles and flies in poultry houses and for control of fire ants

Advantages:

- Efficacious—boron-based SafeCide® Brand IC kills larvae and adults. Breaks the beetle life cycle and reduces diseases carried by beetles
- Contains an extremely safe and effective pest control agent (99% orthoboric acid)— larvae and beetles die 3 to 5 days after contact and ingestion.
- Provides long-lasting residual results. Keeps on working up to 12 months — longer than most available products.
- Provides an effective barrier. Kills larvae and adults as they emerge.
- Cost effective — low cost based on per day of activity.
- Can be applied as a dust or spray. Flexible application options let SafeCide® Brand IC fit easily into your particular management program.
- EPA approved, ecologically friendly— non-carcinogenic, no toxic residues. Safe to be applied by humans.
- Is field proven. Field studies* show heavily infested farms treated with SafeCide® Brand IC have better feed conversion rates, increased weight gains, greater livability, and fewer condemnations than untreated farms.
- No insecticidal resistance reported.
- Retards the growth of Aspergillus in the litter.
- Approved for use in the control of fire ants and flies.
