

"MIRACLE GIRL" TELLS HER SECRET

Angie Arnold; "The Miracle Girl" from Noble Oklahoma tells how she gives Vitamix the easy way.

To save time, I mix enough vitamix for several days with equal parts sweet feed or ground corn. I put it near the cow or cows I am going to feed it to. (The ones that have symptoms of a contagious disease or infection like a cold, cough, off their feed, fever, mastitis, virus, etc.) When I go into the barn I give a handful the first thing and another handful every hour or two and one when I leave. I do the same at night or any time I happen to walk into the barn at midday, late evenings or night (at least six times a day). It only takes a minute and is a lot better than using antibiotics. Also you can sell the milk when using Vitamix. Antibiotics damage the immune system. Vitamix feeds the immune system.

I use Vitamix for calves that have scours, cough, colds, chills, fever, etc. Six times a day. I just open his mouth and pour it in with my hand. I put Vitamix in the milk two or three times to all baby calves **before** they get symptoms (six times a day if they already have symptoms). When I use milk replacer, I use the one that is free of medication.

When my neighbors have a sick pony, calf, lamb or pet I just give them Vitamix; and they call me the "miracle girl". This is the easiest job in the world. You can sit around waiting for a miracle if you want to; but I am going to order some Vitamix. **I will get the Vitamix for sure.**

If you have a sick horse, cow or calf; call Frank Lampley. Frank is a friend of mine. He will send you some Vitamix today. Just tell him Angie sent you.

My mother works for Frank Lampley in his Oklahoma office and I hear her telling people about Vitamix all the time. They often tell mom Vitamix is a lot better than the newspapers and magazines say it is. If you call before 3 pm EST you can have Vitamix tomorrow.

P.S. Be sure to read and follow the directions or Frank will yell at you.
