

**NY Phil Frozen Eggs**

JUNE 27, 1997

Prices were unchanged. The market tone was steady. Demand remained light to fair. Floor stocks of finished products were adequate. Shell egg supplies were about adequate throughout the East Coast, and prices were generally unchanged. Liquid and frozen eggs (ingredients included) processed under federal inspection in the Eastern region for the week ending June 21, 1997 were 15% less than the prior week, and 20% more than the same week last year.

JULY 1, 1997

Trucklot buying activity was spotty with some dealers a bit more cautious than others. Offerings were irregularly available and for the most part confidently held. Most dealers had sufficient floor stocks for immediate requirements. Retail and distri-

butive movement was about moderate, but expected to increase for the long holiday weekend. The market tone was mostly steady.

**National Egg Market**

JULY 1, 1997

Prices were unchanged to lower for mediums and smalls on the East Coast, and elsewhere, prices were unchanged. The market tone remained mixed with the large sizes generally steady, and light sizes were steady to weak. Demand continued mixed, and was mostly moderate. Supplies of large sizes were tight to adequate and smaller sizes were fully adequate to ample. Offerings of shell eggs to breaking plants were at least adequate for the light and

unaggressive demand and the undertone was general steady. Spent fowl availability was sufficient for this week's reduced holiday schedules.

**National Grain Market**

ST. JOSEPH, MO  
JULY 1, 1997

Wheat bids slightly lower, corn and especially soybeans sharply lower. Wheat mostly 2 to 3 cents lower with Minneapolis 11 cents lower. Corn 4 to 7 cents lower. Sorghum 10 to 11 cents lower. Soybeans 34 to 40 cents lower. Harvest pressure, good weather conditions and slow export demand were weakening factors for wheat bids. Harvest progressing and good yields are being reported most places. However, higher protein crops are scarce. Corn bids declined as favorable weather conditions continue across the Midwest. Beneficial rains overnight were reported in places. New crop corn bids and some of the off rail country elevators down around 2.25 per bushel and a couple of months ago they were around 2.40. Very sharp declines in soybean bids again due to USDA's acreage report yesterday with a record 70.9 million acres planted. The largest since 1982. Currently soybeans in very tight supply but beware farmers. New crop bids at country elevators have dropped fifty cents in the past two days and now well below 6.00 per bushel. Expectations of a record harvest this fall is the primary depressant factor. This given some producers second thoughts about following beans behind wheat harvest. U.S. Export Sales:
