AXIAL-FLOW COMBINE

Happy 20th Birthday! to Case IH AXIAL FLOW Combines

The Axial Flow concept was new in 1977. After twenty years the single rotor design that eliminated straw walkers and increased the threshing and separating area through the use of centrifugal force is still the same. But the technological advances in the 2100 Series make their cousins of 1978 and 1979 seem like antiques.

PRODUCTIVITY, PERFORMANCE, and PREMIUM GRAIN were the hallmarks of the axial flow combine in 1977 and they still are today - - more so because of the steady productivity and performance improvements, made over the past 20 years.

Hooper People are proud of their association with the Case IH Axial Flow combine since the beginning. Our customers know that our commitment to the Axial flow is based upon our ability to make the Axial Flow combine out perform the competition in all crop conditions.

MAKE YOUR NEXT COMBINE AN AXIAL FLOW COMBINE FROM HOOBERS.
