DISC MOWERS with an attitude

New Models 615, 616 and 617

When difficult crop conditions are the name of the game, New Holland disc mowers are designed to play tough. Forget about fire ant hills, gopher mounds and thick, wet grasses - they're no match for the New Holland design.

Travel as fast as ground conditions will allow with the new five-six and seven-disc modular cutter-bars. They breeze through the toughest conditions with non-stop, trouble-free cutting for clean, even cut in less time.

Tough-with a quiet side. New Holland disc mowers are redesigned for quieter operation. They're tough on crops, but easy on you.

Strength of design
The New Holland design uses small-diameter, steep-profile discs that act as a "natural lifter" for your crop. Their special shape improves crop flow, reduces streaking, and leaves you with a fluffier swath for improved drying. Smoother profile discs provide better wear and long life. Unlike competitive design, New Holland discs don't have a ribbed surface to wear out. Discs are 3/16" thick and heat-treated for added strength and impact resistance.
