Cleanest waterer ever invented!

Self-cleaning

The JUG is designed so that debris and feed are sucked up from the feed trap in the bowl with each watering. Debris won't foul the water.

Low-maintenance

Light-tight design so that algae and odors won't build up in the JUG's interior.

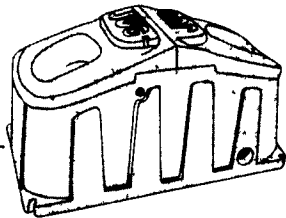

Animals adapt easily

The JUG is designed so that animals, even calves, can suck water naturally, no balls or flaps to get in the way.

The JUG is manufactured by Edstrom Industries which has 25 years experience designing watering devices for animals.
