

With Good Corn Markets Top Performance In Planting Is Very Very Important. For Top Performance In Planting, You Need A Kinze From Binkley & Hurst Bros. Inc.

KINZE PLANTERS THAT SIMPLY PLANT!

BUY NOW, PURCHASE NOW
w/PAYMENTS GUARANTEES LARGE PRE-SEASON DISCOUNTS

For Big Capacity, Call Binkley & Hurst Bros. Today

825 Bushel Capacity

840 Wheel

Ready For Delivery

SPECIFICATIONS	
Total Capacity*	840
Bushels/Minute*	825 bu
Vertical Auger	290 bu
(Full pitch RH All Models)	16"
Horizontal Auger	Front 12" Full pitch LH
Fighting	12" & 14" 3/8 Helicoid
Gearbox	All Models
Chain	A 75 Heavy duty
Tires/Tracks-Std.**	Double No 80 roller
Spindle/Hub	30 5"x32" (12 ply)
Scale Option***	4 1/2" 10 bolt (2)
Tractor Requirement (Minimum)	J Star Electronic 3 3/4" shear axle system

We Can Customize One For You!
We Specialize In Planters!

6, 8, 12 and 16 Row TWINLINE (12' Transport Width)

- Markers
- No-Till Openers
- Liquid Or Dry Fertilizer

PULL TYPE MODELS 4, 6 or 8 Row 28"-40" Rows

MANUFACTURER OFFERS MORE CONFIGURATIONS TO MEET YOUR SPECIFIC PLANTING REQUIREMENTS

- Liquid/Dry
- Single Or Double Frame
- Frame Or Unit Mounted No-Till

Performance Starts here With Superior Design Row Units

KINZE ROW UNITS

THE KEY TO EARLY SEED GERMINATION

You start with a simple, dependable row unit design with easy adjustments that give you exact depth control, and the most ideal seed-to-soil contact possible. At KINZE we call it "Precision Placement." Simply put, it's the toughest most dependable system in the field today.

How does it work? At the exact point of seed placement, 15" double disc openers and dual gauge wheels combine to mold a clean, consistent V-formed seed trench at a pre-set depth. Trailing V-closing wheels then securely press the seed trench walls on each side of the seed for positive seed-to-soil contact, virtually eliminating air pockets and leaving a loose "hill" of soil on top of the seed. It's the ideal environment for the emerging seedling.

Each row unit is independently adjustable for depth and down pressure. Spring-loaded parallel arms give you all the flexibility you need. Down pressure? Your choice. Standard, quick-adjustable dual springs for conventional planting, or quad springs (shown right) for conservation tillage. Each with four positions so you can set the unit's down force for your conditions.
