50 YEARS OF SILO FILLING!

Marlin Brubaker at Little Britain Ag Supply is in his 50th year of custom silo filling. And this year, with a Claas 860 Harvester, he harvested over 2,000 acres. Congratulations!

At M.M. Weaver & Sons, Inc., we admire Marlin Brubaker's steadfastness and we're pleased to have been able to serve him through the years. In 1993 he bought the first Claas 695 Harvester we sold, in 1995 he bought our first 860 Claas Harvester, and in 1997 Marlin bought our first Row Independent Corn Head. *Thanks for your business.*

The header shown below is the one Marlin Brubaker used this year to harvest 2,000 acres of corn.

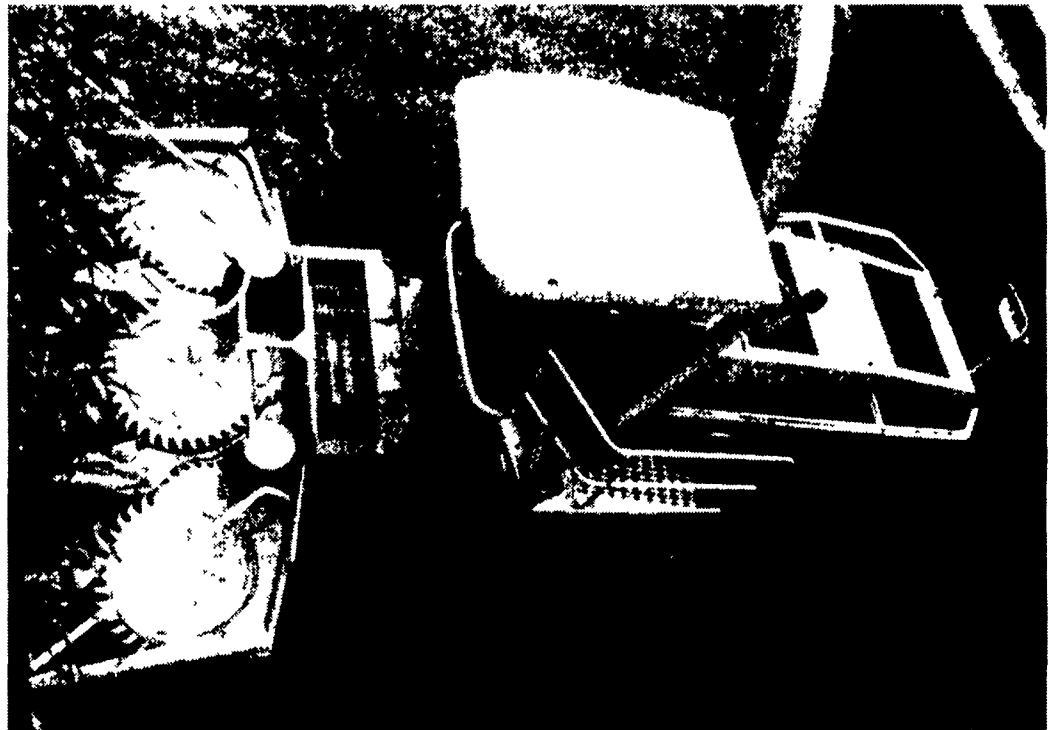

HARVEST CORN NO MATTER THE ROW SPACING WITH NEW RU450 INDEPENDENT CORN HEAD

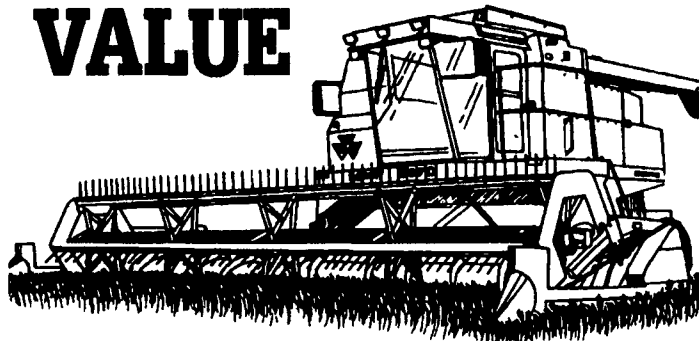

Claas of America offers the RU 450 row independent converging corn head for its self-propelled forage harvesters. The RU 450 enables corn to be harvested no matter the row spacing or direction harvested and features a working width of 14'9".

The head features three rotating drums which cut and deliver the crop. Double transport discs on each drum capture the corn plants for crop delivery. The mowing disc, located under the transport discs, cuts the crop and then delivers it to the feed augers. The three-symmetrical rotors assure even crop flow to the feed rollers.

The chainless rotor drive system is made up of universal drive shafts and oil bath gearboxes. Drives are protected by low maintenance overload clutches. With fewer moving parts than a conventional corn head, the RU 450 requires less maintenance resulting in higher output. Transport of the head is done by activating a hydraulic valve from the cab which folds the outer rotors into a vertical position.

YOUR BEST VALUE

DEMO MF 8570 ROTARY COMBINES

Don't risk a harvest delay. We have excellent-condition MF 8570 Rotary combines all primed and ready to go. These innovative combines are simply the best-

performing, most efficient, highest-quality combines you can buy. Make the most of this year's harvest. Call or stop in today for an outstanding deal.
