

Events Of Interest On the 1997 Farm Scene

The Blue Mountain High School envirothon team became national champions in August. Pictured here from left, front row, Aaron Clauser, Phil McDonald, Tamie Smerlick, and Caroline Watral. In the second row is head advisor Glenn Luckenbill, and assistant advisors Chris Brommer, Bob Bylone Jr., and Richard Eckert. Not shown is team member Jeremy Johnson.

At the Pennsylvania Dairy Princess Pageant held in late September, Nichole Meabon, center was crowned for a year of promotion of the dairy industry. First Alternate Heather Riley, left, and Second Alternate Eileen Murphy will assist Nichole at the state level.

PLANT THE RIGHT ALFALFA

MEDIUM FALL DORMANT

5347LH

Outyields susceptible varieties in fields under pressure from potato leafhoppers.

5347LH contains resistance to these widely distributed insect pests. Also features exceptional resistance to Phytophthora root rot and anthracnose and very good resistance to aphanomyces root rot. Winterhardy with outstanding field appearance and summer growth. Adapted to less-than-well-drained soils.

When leafhopper pressure is severe, spraying new seedlings may increase yields

MEDIUM FALL DORMANT

5312

Produces high tonnage of good quality forage. Winterhardy with an attractive, dark green field appearance. Outstanding defensive package for eight major pests and diseases including Phytophthora root rot, aphanomyces root rot, bacterial wilt, verticillium wilt, *Fusarium* wilt, anthracnose, spotted aphid and pea aphid.

LATE FALL DORMANT

5454

Excellent combination of high forage yields with exceptional winterhardiness. Outstanding resistance to Phytophthora root rot, anthracnose and *Fusarium* wilt. Excellent resistance to spotted alfalfa aphid and pea aphid. Provides fast regrowth and is suitable for a four-cut harvest system. Adapted to less-than-well-drained soils.

Nothing Outlasts It. Nothing Outyields It.
