Light for writing that the vacuum cover pattern for a 4-foot Millie Maid is \$7.25 from The Sewing Centipede, P.O. Box 218-CX8, Midway City, CA 92655. Color catalog is \$2 (free with first order).

ANSWER — For the reader who wanted to know how to tat, B. Light writes that she had trouble too until watching a video and in no time at all she was making rings. Keep a needle and thread on hand while watching the video. If you don't have a video cassette recorder, perhaps you can borrow one or watch it a neighbor's or friend's home. Order from Victorian Video Productions 1-800-848-0284 or request a free catalog of 175 "how to" videos on needlework, lacemaking, knitting, crochet, tatting, beadwork, etc.

The Other Way To Measure A FORCE Field Requires A Scale.

A late mid-season diggery will show you how well FORCE insecticide controls tough insect pests like rootworms, cutworms, wireworms and white grubs. The newer pyrethroid chemistry of FORCE gives you a better, straighter stand than older, less effective insecticides. It's why farmers who've experienced a FORCE Field of protection — in no till, minimum-till and conservation tillage systems — stick with it year after year. And, of course, the measurably higher yields at the end of the season.

The other way to measure is how safe FORCE is to birds, earthworms and you. Our 3G formulation lets you handle half as much FORCE as other insecticides. To save you time, money and cut your insecticide exposure in half. And FORCE doesn't interact with sulfuric acid fertilizers.

For more information on FORCE Field of Protection, Ask your local distributor.
