

You ask we answer

This column is for readers who have questions but don't know who to ask for answers.

"You Ask—You Answer" is for non-cooking questions. When a reader sends in a question, it will be printed in the paper. Readers who know the answer are asked to respond by mailing the answer, which will then be printed in the paper.

Questions and Answers to this column should be addressed to You Ask—You Answer, Lancaster Farming, P.O. Box 609, Ephrata, PA 17522. Attention: Lou Ann Good.

Do not send a self-addressed, stamped envelope for a reply. If we receive the answer, we will publish it as soon as possible. Please include your phone number because we sometimes need to contact the person to clarify details. We will not publish your phone number unless you request it.

QUESTION — John Los, York, is looking for a place to buy a Claxton horn, also known as an "Ah-ooh-ga," horn. During the 1960s, auto parts stores carried the horns in their line of accessories.

... For New Construction Why Not
Examine The "Chimtek Difference."

Chimtek Inner Liners are made of volcanic pumice and high-temperature refractory cements. Its round shape provides even temperature inside flue and contributes to efficient flow of smoke and flue gasses. The volcanic pumice in Chimtek liners adds considerable insulating value.

All three chimneyliner systems distributed by DS Machine Shop are of super design, super performance, and super value. With all their advantages these chimney systems often cost no more than ordinary chimneys. Write or call us for more specific liner information.
