Case IH 8580 Center-Line Rectangular Baler

The Case International 8580 is designed for commercial producers and large hay operations that have big package needs. With a 46 5" x 50 0" (1 18 x 1 27 m) bale chamber, the 8580 can form a bale up to 108" long, weighing up to 2,200 lbs (1000 kg). Just right for efficient handling, stacking and trucking

TOP-END PRODUCTION
The 8580 is no ordinary baler. This system is designed for high-capacity hay production. The 8580 can pack the equivalent of 20 to 40 conventional rectangular bales into a single package, and is capable of producing over 200 bales a day. Also, storage requirements are actually reduced versus the equivalent tonnage of small rectangular bales. This size bale is convenient for transport, and handling and stacking these bales is a snap, too. They're much more manageable and stack better than round bales that are comparable in weight. The best part about the 8580 though, is that it makes high-quality, weather-tight bales. You won't find another line of balers that makes better quality hay. It all begins with the center-line design - the same concept used on all Case International rectangular balers. From the time the crop is swept up by the wide,

low-profile pickup until it exits the bale chamber, it moves in a straight line. The end product - a uniform bale that cures evenly for high-quality hay. These bales feed better than others do, too. Just cut the twine and break off as many flakes as your livestock need. Or, they're easily ground or processed for feeding in either dairy or beef operations

QUALITY CONSTRUCTION
We know how critical field performance is to your success. Reliability is expected when buying any new piece of equipment. That's why the 8580 is designed for ease of operation and built to last. Its 18,700 lb weight is a testament to the amount of steel that goes into building one. Its main frame, axle and hitch are high-strength, welded box-beams constructed to resist the twisting forces of rough terrain. It doesn't stop there. The massive gearbox transmits high torque loads, and a 460 lb fly-wheel absorbs and overcomes peak loads for smoother operation. And, the 8580 features heavy-duty packer and stuffer fingers, as well as a heavy-duty plunger with a short 30-inch stroke length and 25.4 stroke-per-minute speed for reduced wear while being gentle on tender crops.

If You Want Precision Seeding, You Need A New Case IH 5300 Series Grain Drill From Binkley & Hurst Bros. No Matter If You Plant Small Grain Or Soybeans!

A Special Feature For All Case IH Grain Drills

Fluted Roll Feed Cup Assemblies Save Seed and Save Time

A Known Fact That Case IH Die Cast Zinc Alloy Feed Cups Are Superior To Other Competitive Brands Long Life Comes From Oil Impregnated, Molded Sintered Metal Inserts Acts As A Positive Bearing Surface To Surround And Support The Fluted Roll

For replacement parts for your existing drill, buy Case IH quality from our Parts Dept. Now! Precision engineered to fit your grain drill exactly!

Large throat clearance allows the handling of big seeds and prevents seed damage

Fluted roll is precision-molded and won't freeze up during the idle periods.

Shut-off block is molded of steel and delivers consistent cup to cup seeding accuracy. Exclusive tapered metered edge at the bottom of the feed cup provides unexcelled seeding accuracy, even seed flow, and more uniform spacing
