The Most Powerful Blower Made In Stock At Binkley & Hurst Bros., Inc. - 1000 RPM Model 1580 Gehl - Get One Today!

Choose The Gehl Blower That's Right For You

With three models it's easy to match a high-capacity Gehl blower to your operation. In side by side tests at a 100' silo, Gehl blowers out-performed the best the competition had to offer, with the Model 1580 cleaning out an 18' self-unloading box full of haylage 18% faster than the closest competitive blower and 25% faster than one of the so called "leaders"

Gehl's secret is the twin spinner delivery system and the twin-sided fan. Two 24-inch spinners rifle your crop into the blower fan at nearly 35 mph. There, the twin-sided fan, with paddles on each side, blows the material up the pipe with ease - it's almost like getting the performance of two blowers in one

Gehl blowers are also loaded with on convenience features you're sure to appreciate

As a guideline, we recommend the following

Silo size	HP required	Gehl Model
20'Wx60'-70' high	70 hp	FB1540
20'Wx80' high	90 hp	FB1580 (540 rpm) in stock
25'Wx90' and higher	100+ hp	FB1580 (1000 rpm) in stock

Adjustable left tire.
Setting up at the silo is faster and easier. The adjustable left axle lets you line up the blower without loosening and adjusting the rim sheet. Simply adjust the tire up or down until you get the matching angle to your pipe

Swing away blower outlet.
They're more than tremendous blowing capacity designed into these blowers. Gehl swing away outlet makes it easier than ever to check fan paddle and rim sheet clearances and for rim sheet liner replacement. (Note this outlet should never be opened until the pto is disconnected from the tractor and the blower disc has stopped turning)

Greater rim sheet life.
These blowers feature split rim sheets with a special inner replaceable liner. This extra hard liner is twice the thickness of ordinary rim sheet steel. In addition, when it finally does wear out, you only replace the liner that fits in the extreme wear area of the blower, right below the outlet. You don't have to replace the entire rim sheet! The result reduced costs over the life of your Gehl blower

Easier, faster fit to silo pipe.
Once you have the fit angle between your blower outlet and your pipe, it's easy to slide the telescope pipe into position. This new lip assures proper alignment and fit

Tire Guard.
This tire guard protects the right blower tire when you're cleaning up around the blower with a silage fork. It is standard equipment on the 1580 and 1560, optional on the 1540
