Rake a Clean and Fast Swath of 11'2" With a New Rake from Binkley & Hurst

Thorough Construction

With large treads and wheels with balloon tires placed closely to the rake tines, a good adaption to the ground and an efficient clean raking can be obtained. The swaths are placed in airy, quick-drying swaths easy to pick up. The articulating head-stock is something between a normal three-point suspension and a drawbar. The rakes follow the tractor freely as with towing, but automatically swivel behind the tractor and locked in transport position when raised. The rakes follow the tractor far into the corners and can rake the swaths waway from the fence. Many rake arms with 4 double rake tines give the machine a high capacity. Easy fold up for road travel and storage - 5'3" width
