SE8 SE10 In Stock
 The streamlined close-coupled design allows economical operation on tractors as small as 30 horsepower on the SE8 and 45 horsepower on the SE10. The 85 HP center gearbox and 60 HP outboard gearboxes are protected from sudden shockloads by a slip clutch on the main driveline and torque dampers on the side driveshafts. Pan blade carriers help the unit glide over field obstacles and updraft blades with a 4 blade overlap provide a clean cut. The SE8 is available as a 540 RPM unit with either a CAT II lift or clevis pull-type hitch to fit a range of tractors. The SE10 is available with either a heavy-duty CAT II-III Q.H. or pull-type hitch for 540 or 1000 RPM tractors. The 10 gauge deck is reinforced front-to-rear and side-to-side for optimum strength. The Cat 4 main driveline and all gearboxes are fully-shielded for greater operator safety. Front and rear safety deflectors are standard equipment to help reduce the risk of damage or injury due to thrown objects. Front and rear chain guards are optional equipment. Compare and you will see why the Rhino SE8 and SE10 are excellent choices for economical wide-cut mowers

Mayrath InLine Drive
 Unique in design, high in efficiency
 The patented InLine Drive system is the most advanced in the industry. It features a unique design that allows for a high volume of grain flow around the internal gearbox. A new intake design utilizes double flighting and a cupped intake guard to offer a high capacity, complete cleanout operation. A specially engineered hopper bolts directly to top of the intake guard, further enhancing the augers capacity
