Check Out Our Unique Features

**Tedder**

**Rake**

### UNIQUE FEATURES

GOOD ADAPTION TO GROUND CONDITIONS

The wheels of the machine have been positioned with the shortest possible distance between them and the front rake tines. An even and steady performance, with good clean raking can be achieved under all conditions

### UNIQUE SWATH ROLLERS

JF's patented swath rollers form a perfect swath for baler or forage harvesters. The swath rollers are free to float and therefore always follow the contours of the field, so you have a rapid flow of work without stopping. The rollers are, of course, adjustable for various swath widths

### OPTIMUM SECURITY OF SPRING TINES

Clamp A retains the spring tine if it should brake, protecting the forage harvester or baler from damage
