## HYDRA-SPREAD

The simple and proven design of Hydra-Spread uses reliable hydraulic power to push the load. This feature eliminates troublesome apron chains, gearbox, shafts, and sprockets and replaces them with a simple, dependable, hydraulic cylinder assembly. Sides and floor of the Hydra Spread are made from super-slippery, corrosion-proof, high density polyethylene. The rugged efficient beater design delivers a fine uniform spread pattern. The all-welded unit frame features heavy structural sections for long life.

Hydra-Spread unloads smoothly and evenly with a simple, dependable, hydraulic push gate. Unloading speed is controlled by a precision metering valve.

Floor and sides are solid, corrosion proof polyboards containing over 90% recycled material. Stronger than new and we're helping the environment.

Simple, dependable power train. Every shaft connection from the tractor to the top beater is splined.

HYDRAULIC PUSH-GATE TYPE MANURE SPREADER
