BUY QUALITY RHINO EQUIPMENT ON SALE AT BINKLEY & HURST BROS. INC.

The Rhino® SE8 and SE10 are economical rotary mowers designed to help maintain larger acreages of grass, weeds, stalks, or material up to 1" in diameter.

The streamlined close coupled design allows economical operation on tractors as small as 30 horsepower on the SE8 and 45 horsepower on the SE10. The 85 HP center gearbox and 60 HP outboard gearboxes are protected from sudden shockloads by a slip clutch on the main driveline and torque dampeners on the side drive shafts. Pan blade carriers help the unit glide over field obstacles and updraft blades with a 4 blade overlap provide a clean cut. The SE8 is available as a 540 RPM unit with either a CAT II lift or clevis pull type hitch to fit a range of tractors. The SE10 is available with either a heavy duty CAT II III Q H or pull type hitch for 540 or 1000 RPM tractors. The 10 gauge deck is reinforced front to rear and side to side for optimum strength. The Cat 4 main driveline and all gearboxes are fully-shielded for greater operator safety. Front and rear safety deflectors are standard equipment to help reduce the risk of damage or injury due to thrown objects. Front and rear chain guards are optional equipment. Compare and you will see why the Rhino SE8 and SE10 are excellent choices for economical wide cut mowers.
