

## Main Street Tractor Tour Comes To Area

COCHRANVILLE (Chester Co.) — Farmers will get to see and drive the new line of Case IH MX Series Magnum tractors at a field day hosted by Hooper, Inc. on Thursday, Oct. 29.

The field day, held on Glen Engle Farm southwest of Cochransville will feature the complete line of Case IH MX tractors as part of Case IH's Main Street Tractor Tour. And while there will be plenty of machinery on display, the center of attention figures to be the new MX Series Magnums.

Five new models, ranging from 145 to an industry-leading 235 PTO horsepower, will be available for farmers to learn about and test drive. According to Case IH, the new MX Series Magnums offer the industry's best combination of productivity, power, performance, comfort and convenience. In addition to the tightest turning radius in their class, the new MX Series Magnums also have a cab featuring increased visibility, ease of operation, and unsurpassed comfort.

The MX Series Magnums won't be the only equipment farmers can work out in the field. The MX Maxxum tractors will also be on hand, and those attending the field day will also be able to operate a Case IH Axial-Flow combine in corn.

Case IH representatives will be on hand to discuss the technology behind Advanced Farming Systems and how today's technology can help farmers make their land as productive as possible.

The field day will run from 8:30 a.m. to 3 p.m. and lunch will be served. Glen Engle Farm is located 1/2 mile southwest of Cochransville on Rt. 10. Signs will direct guests to the field day site.

### LIQUID MANURE SPREADER

**WITH FLOTATION TIRES TO MINIMIZE SOIL COMPACTION**  
Available with complete line of spreading tool bars and precise flow control to spread manure the ecological way eliminating spray drift and reducing odors. Our tool bars are designed to apply hog or dairy manure on growing fields, between rows of corn or on harvested fields.

## My calendar has 365 days

**T**he Ephrata National Bank has been providing loans and other banking services to farmers since 1881. Many of the philosophies that helped ENB enjoy more than a century of growth are as important today as they ever were.

Take the way we calculate interest on loans. The traditional way to calculate interest on a loan is to use the number of days in a year, which on my calendar is 365. Many, if not most, lenders use a 360-day year.

What does that mean to you? Well, on a \$100,000 loan at 8 1/2% (the current prime rate), your interest bill at ENB would be \$8,500. If you paid interest on the basis of a 360-day year, your loan would cost you \$8,618, or an annual difference of \$118.

If you prefer the traditional way we calculate interest, give me a call. We've got lots to talk about.

Bob Zook  
President
