**Purchase Heavy Duty Rock Collection Equipment From Binkley & Hurst Bros. Today! Remove Field Rock & Save Your Equipment. Check Our Finance Plans.**

In the Degelman tradition of quality rock removal equipment, here is the RR1500 rock rake, another example of Degelman's continuing commitment to excellence.

The RR1500 rock rake includes a unique auto-fold system which provides safe, easy transport no wider than most tractors (8 feet in transport position) with full use of the 14 foot width in the working position. And with hydraulic angling, it can take full advantage of the 10 to 30 degree angling range.

Degelman Rock Rakes are excellent machines for grooming fairways and conditioning soil for the construction of golf courses. It leaves a beautiful final finish preparing the course for seeding. They are also used for reclaiming gravel on gravel roads. And the heavy duty construction and quality workmanship means that it is built to last.

From Small Tractors to Large 4 Wheel Drive Sizes (Many Uses for a Heavy Duty Degelman Dozer Blade)

From leveling Silage in Bunks and Grading Excavation to Snow Removal, See Binkley & Hurst For Your Needs!

The SIGNATURE 6000 may be the only rock picker you'll ever need. This is the most rugged rock picker on the market. Some of the SIGNATURE 6000 features include:

**Solid Shaft Grill Tines with Replaceable Grill Tips** - This modern grill is easier to maintain, has longer life giving you less down time. The unique grill provides five feet of clean sifting and virtually jamless performance.

**Grated Hopper Bottom** - We use spring steel straps in the hopper, engineered to bounce back in shape.

**Hydraulic Drive** - The most popular drive on rock pickers is hydraulic which is standard on the 6000. We have incorporated a relief valve to take away the shock when disengaging the drive.

**Reel Assembly** - The three paddle reel has a large diameter, hard surfaced teeth and heavy duty paddles.

**Flotation Tires** - The 16.5L x 16.1 flotation tires are standard equipment and are a must to reduce soil compaction.

**Swing Pole** - Easy to maneuver in both working or transport position.
