Price)

Getting
rid of those
annoying
hang-ups in your
operation is easier than ever.

The new SURGE® One Touch™ makes stanchion milking as easy as this. A lightweight, gun-grip design integrates the milk line and pulsation connections into one simple process. Yet it's built incredibly tough to handle fine real world demands of the dairy barn. Most importantly, One Touch brings high-tech automation to stanchion operators with two optional management modules. The TIMEKEEPER™ II module signals you when the cow finishes milking and displays how long she took to milk - promoting fast, consistent milking that leads to better udder health. The Milk Yield Module measures individual cow production and milking time, allowing instant analysis of each cow's performance. By putting today's production information at your fingertips, the SURGE One Touch lets you capture your cow's performance in the palm of your hand.
