DYNASHIFT TRANSMISSION

From Massey Ferguson
32 Speeds with the best features of manual and powershift design

Simple concept, simple design.

The Dynashift transmission features a smooth, 4-speed powershift matched to a rugged, 4x2, fully synchronized gearbox. The results are truly greater than the sum of the parts.

Like a powershift.

Get the ease-of-operation and productivity of four no-clutch powershifts. Each of the four powershifts gives you an ideal 17% increase in speed.

Like a synchromesh.

You get the low power loss and reliability of an 8 speed manual transmission. More of the flywheel horsepower is available for use in all other tractor functions. Up to half the power loss of most full powershift tractors.

Like a shuttle.

The synchronized independent shuttle lets you quickly reverse directions in any of the 32 gears with one quick shift. There's no need to sequence through multiple gears or navigate a complex shift pattern.

Powershift unit
 Shifting through four Dynashift speed ranges, A, B, C and D is entirely clutchless

Main gears

Reverse
 Synchronized independent shuttle lets you keep the same speed in forward/reverse operations

Like no other transmission.

"Intelligent overlap" means you can always select a gear to shift-on-the-go with a 17% speed change. And you get the highest number of gears in the 2.5 to 7.5 mph (4 to 12 kph) working range.

MASSEY-FERGUSON

Dynashift is standard on 8100 Series tractors, optional on 6100 Series tractors.
