## Move 'Em Out!

### NEW! Cen-Trak™

Power Drive Unloader

Power Drive Unloader

Meet Cen-Trak! The new and better concept in single-cable unloaders. Simple, dependable power drive design eliminates the problems of other high-torque, center-driver machines.

See your Starline Dealer for literature and pricing!

Jamesway Technology Takes a Giant Leap Forward!

## BIG JIM. Quantum™ SYSTEM

FOR CONVENTIONAL SILOS AND BOTTOM UNLOADING SILO CONVERSION SYSTEMS (U.C.S.)

**FASTER FEED UNLOADING** - up to 35 tons per hour or up to 1,666 pounds per minute.

**HIGHER SILO CAPACITY** - pack up to 35% more forage into your silo.

**GREATER FEED VALUE** - ensile forage between 55% to 65% moisture content.

**EASIER MAINTENANCE AND REPAIR** - less wear and tear and components are accessible.

Also available - Ring Drive and Surface Drive unloaders

# YOU JUST CAN'T MATCH

## OUR MIX TMR Ruffage Master

These new Oswalt four auger Model 200/250 mixers are designed to process and mix all feeds, including baled hay, into a fully-blended TMR...better than anyone! The aggressive, notched, 20-diameter, full-pitch, four auger mixing pattern.

**OSWALT**  
Mixer by J-STAR

and exclusive, self-lubricating Tuff-Glide® liners help feed materials flow more freely, reducing horsepower requirements and virtually eliminating material hang-ups and dead spots. The end result: A better quality of mix! See your Oswalt Dealer today!

## ROTO-MIX FEED MIXERS

The ROTO-MIX professionals know that quality feed means increased consumption, therefore, higher production levels. With ROTO-MIX IV you reduce fines, minimize shrinkage, and eliminate dead spots. The gentle tumbling action mixes fragile flaked and high-moisture ingredients without grinding, resulting in a fluffier, more nutritional ration. Nothing robs a ration of nutritional

value more than fines. Conventional auger mixers use pressure to move the feed through the mixing chamber, thus crushing the feed and creating fines. But the ROTO-MIX patented mixing system uses a rotor to gently lift the feed past the wedging point of the lower side auger, keeping fines to a minimum and reducing nutritional loss. Even the most nutritious ration is effective only if the

cattle eat the complete ration. Improperly mixed feed allows the cattle to "nose out" what they don't want, disrupting the balance of nutrients. But the ROTO-MIX end-to-end side-to-side mixing system provides the most thorough TMR available, ensuring that your cattle will consume a balanced ration of nutrients in every pound of feed they eat.

Check all the ROTO-Mix advantages...  
the bottom line is what counts.
