

PMCGA, NCGA

Want Your Membership

UNIVERSITY PARK
(Centre Co.) – Consider joining NCGA and PMCGA today to be part of a national effort to promote corn and corn producer-related issues.

With our Membership Incentive Program, corn producers who grow five or more acres of corn can now join both organizations with little real cost.

The MIP program works like this: if you sign up for a three-year joint membership for \$75, you can receive a free bag of seed from one of your participating industry partners listed on the form. To get signed up, complete our membership form and send it in to our office at the address listed on the form along with a check for \$75 made payable to PMCGA to cover the three-year membership.

Our office will then send your name to the seed company you have selected and a coupon to you indicating you have qualified for the program. You will then be contacted by one of the seed company reps and your seed will

be delivered before the planting season.

This is a win win win proposition – you get a bag of seed and membership in a large national organization for \$75, NCGA and PMCGA get your support, and the seed industry gets to showcase new genetics to key producers.

As a member of NCGA,

you can be part of a 30,000-member national organization that is addressing many of the issues we face in the corn industry. Issues include corn prices, industry consolidation, environmental issues, and development of new markets for corn.

NCGA also sponsors the national Corn Yield Contest and Commodity Classic. They also send a quarterly

newsletter to all members entitled the National Corn Grower.

PMCGA sponsors one or two conferences a year, the Five-Acre Corn Club and *Corn Talk*, and helps to promote corn issues to the public at many local events.

If you are a corn producer who grows at least five acres of corn, consider joining for three years today and taking

advantage of the MIP program. Use the MIP program to look at some new hybrids that some of our seed company partners have available this year.

Remember that membership in the Pennsylvania Master Corn Growers Association (PMCGA) automatically makes you a member in the National Corn Growers Association (NCGA).

For Better Seed Beds – Better Stands A Brillion Soil Management Tool Brillion Commander System

SELF LEVELING

Brillion's Soil Builder feature coulters that cut up stalks and crop residue or rise above the ground for light trash conditions. Shanks penetrate the soil up to 12 inches to shatter plow pan to improve root growth increase water-holding capacity. Most of the crop residue is left on the surface to combat wind & water erosion.
6'3" Soil Builder in Stock

The Brillion Soil Commander, best in the field for soil conservation efficiency.

The Soil Commander is a versatile tillage tool designed to meet the needs of the mid-size farmer who uses a 135-200 H.P. tractor. One of the keys to the machine's versatility is that it uses interchangeable shank legs and individually mounted disk assemblies instead of a disk gang. This makes possible a machine with disk assemblies on the front and rear of the frame with chisel plow or deep-ripper shanks on 15", 24", 27" or 30" spacings.

Brillion
COMMANDER SYSTEM

BRILLION PULVERIZERS

The pulverizer has long been one of the farmer's most valuable tools. When pulled behind a disc or field cultivator the pulverizer will help create an ideal seedbed with fewer trips across the field.

Some of the most valuable soil nutrients are locked in the clods left in your field. The Brillion Pulverizer crushes clods to release those nutrients for use by growing plants. At the same time air pockets are eliminated and moisture is drawn up the root zone by capillary action. Good soil to seed contact creates more uniform germination, pollination and maturity... and that means increased crop yield and greater profits.
