8500 SERIES SMALL SQUARE BALER

HOLD ON TO MORE HIGH-PROTEIN LEAVES WITH THE CENTER-LINE DESIGN

With a Case IH 8500 Series Small Square Baler, your hay has a straight shot through the baler. From pickup to bale chute, all Case IH balers feature the field-proven center-line design.

Other baler designs force hay to change directions or turn corners, which can cause leaves to shake off or tear loose, taking your feed value along with them. Fortunately, the center-line design on Case IH balers helps your hay hang on to more of its protein rich leaves, giving you bales with more nutrition.

Here's how your hay becomes a solid bale built to stack like a brick. Hay enters the wide, low-profile pickup

and meets plenty of crop-hungry tines. Then centering augers gently feed it to the prepacker chamber. Hay is swept in by a stuffer fork and compressed into a uniform flake.

Next the preformed bale flake enters the bale chamber just ahead of the plunger. Each charge of the heavy duty plunger makes one flake until a square-cornered bale is built.

The result? Bales of consistent density and shape that pack a powerful nutritional payload. And you get rock-solid bales built for better stacking, storage and transport.

From the center-line design (8545 shown) hay goes in the same direction it comes out so you don't lose any protein-packed leaves. And because tines are preformed for uniformity, every bale is created in size, shape and density. Better yet, leaves are more evenly distributed throughout the bale for uniform curing and improved feed consumption.

Unlike other balers, the center-line Case IH baler has a single set of tines on both sides of the auger. This allows for a more uniform distribution to reduce crop chaff in your bale. For an even more complete side add-on, you can add high-traction tires.

SMALL 14X18 BALES...BIG CASE IH QUALITY

From the smallest 8520 to the medium-duty 8530 and the deluxe 8545, Case IH offers you three choices in the 14x18 in. (36x46 cm) bale category.

All models boast the advantages of a center-line design. It's a difference you'll quickly see in consistent bale quality as you get bale after bale of solid, stackable, tied-to-last bales.

These three models of balers get the job done right with wide, low-profile pickups, high-speed, short-stroke

plungers, constant-velocity drivelines, and reliable knot-ter and twist-ers. A big-capacity twine box boosts productivity, while a standard bale counter tracks the day's progress.

Optional features include hydraulic density control, high-traction tires, hydraulic pickup lift, wire tie version of the 8545, light kit for night baling, quarter-turn bale chute, the 8511 Bale Thrower, and a bale chute extension with wagon hitch. See your Case IH dealer for full details.

For maximum capacity and speed in the 14x18 in. (36x46 cm) bale category, look to the high-performance 8545 in a 13-tine or wire version. Its 100 SPM plunger, wide 4-bar pickup, plus heavy-duty frame and reliable components, add up to season after season of quality baling.

With a 7.5 ft. (2.3 m) wide pickup and 100 SPM plunger, the big brother, the high-hungry 8530 can make quick work of your toughest crops. Add an optional quarter-turn bale chute to set bales on their sides. This keeps them off the ground and positions bales for easy access and retrieval.

Make baling a one-person job with the wagon-hitch capability of the Case IH 8511 Bale Thrower. Available for all three baler models, this set-on-to add hydraulic system with diamond tread beds. It's your bales right where you want them.

Down And Tangled Undergrowth? No Problem!

Case IH Disc Mower Conditioner

Non-stop cutting for higher productivity

- Clean cut at higher ground speeds
- Faster cutting in dense or tangled crops and over obstacles
- Overhead frame design allows unrestricted crop flow
- Automatic roll separating system eliminates plugging

Designed, tested and manufactured by Case IH at its Hesston, Kansas facility

Fits the way you farm

- 9' side-pull of 12' cutting widths available
- Choice of intermeshing conditioner rolls to match your needs
- Quick-convert from field to transport mode

Along with dependable mower conditioners, you can count on us for genuine Case IH parts, professional and reliable service support and flexible financing.
