Broiler  
ATLANTA, GA.**

MAY 26, 1999

**DELMARVA BROILER/FRYER  
MARKET. FEDERAL-STATE**

Movement of ready-to-cook whole birds was mixed and irregular and generally no better than fair. Offerings varied by both volume and size from one plant to another, with 3 pound sizes in the closer balance and 3.5 to 4 pound sizes readily available. Live supplies were moderate; weights were

mostly desirable to heavy. Processing schedules were moderately heavy. Less than trucklot asking prices were generally 55 to 67 cents. Trade sentiment was about steady. In the parts complex, supplies were at least adequate for current inquiry. Buyers generally looked to build floor stocks prior to the holiday weekend, but remained cautious.

# #1 in Rumen Availability Pennfield's Super Flaked Corn™

## ▶▶▶ THE PROCESS INVOLVES ◀◀◀

- 1) Cleaning the corn
- 2) Soaking or steeping the corn for a prescribed period of time
- 3) Applying steam to the corn before rolling
- 4) The specially conditioned corn is then rolled between 2 large rollers
- 5) The wet flat rolled corn is then processed by a special unit that removes the moisture and dries the finished flake back down to normal corn moisture
- 6) The finished product resembles a bright yellow corn flake (makes you want to get a bowl full and add milk and sugar)

### WHY IS SUPER FLAKED CORN BETTER?

Flat rolled steam flaking disrupts the cellular structure of the corn kernels (gelatinization) and increases sites for microbial attachments resulting in improved starch (carbohydrate) digestion in the rumen. In simple terms, the cow uses more of the nutrients because the rumen bugs can get to them and much less corn nutrient goes out in the manure.

**Super Flake  
32% Better
