

**NY Phil
Frozen Eggs
ATLANTA, GA.
MAY 28, 1999**

**EASTERN REGION FROZEN EGGS,
MAY 28, 1999. FEDERAL-STATE**

All prices were mostly unchanged to higher. The market tone was steady to fully steady, and whole and whites were in the strongest position. Demand had improved on yolk products compared to last week, and was fair to good on whole and whites. Supplies were adequate to instances tight.

Liquid and frozen eggs (ingredients included) processed under federal inspection in the Eastern region for the week ending May 22, 1999 were 5% less than last week, and 6% less than the same week last year. Shell egg supplies were adequate.

#1 in Rumen Availability Pennfield's Super Flaked Corn™

THE PROCESS INVOLVES

- 1) Cleaning the corn
- 2) Soaking or steeping the corn for a prescribed period of time
- 3) Applying steam to the corn before rolling
- 4) The specially conditioned corn is then rolled between 2 large rollers
- 5) The wet flat rolled corn is then processed by a special unit that removes the moisture and dries the finished flake back down to normal corn moisture
- 6) The finished product resembles a bright yellow corn flake (makes you want to get a bowl full and add milk and sugar)

WHY IS SUPER FLAKED CORN BETTER?

Flat rolled steam flaking disrupts the cellular structure of the corn kernels (gelatinization) and increases sites for microbial attachments resulting in improved starch (carbohydrate) digestion in the rumen. In simple terms, the cow uses more of the nutrients because the rumen bugs can get to them and much less corn nutrient goes out in the manure.
