WARNING, ALL SILO OWNERS

Check your silo now for rotten staves. If you have been using your silo for 10 to 15 years for either corn silage or haylage, it is time to SHOTCRETE

RESURFACES INTERIORS:

- Coats the silo's interior
- Protects feed in storage
- Durable, tough, acid-resistant
- Increase useful life
- Economical

Before The silo's interior with plaster damaged and stave exposed

After The surface is reconditioned, and a new, thick tough surface will protect stored feed.

REPAIRS HOLES:

- Repairs even large holes
- Up to twice the strength of the original stave
- Rapid application
- Durable surface

Before A hole is worn completely through the silo wall

After With the hole repaired by ShotCrete and a new surface applied, the silo is ready for years of use

EXTENDS USEFUL LIFE:

- Support for old foundations
- Special repairs can be made quickly and economically
- Little or no forming needed
- Stronger than the original

Before The bottom part of the stave's are completely worn away

After The ShotCrete System repairs and replaces the missing structure.

Silage Spreaders with a Heritage of Quality

Lancaster Level-Flo has been the leader in non-motorized silage spreaders for more than 25 years. Each spreader is specifically designed to meet the needs of the individual operator.

Choose the spreader that best matches the equipment you use to fill your silo.

The Model 1030 Multi-Flo® is our standard silage spreader. With a 9" gooseneck, it is designed for average capacity blowers and silo sizes.

The Model 1200 Multi-Flo® has a 12" wide gooseneck. Its larger size all but eliminates plugging problems, even when you blow in haylage. It is especially helpful in larger silos.

The BlueMax® is built for those who push high-capacity silo filling equipment to the limit. All parts of the BlueMax® subject to wear are made 25% heavier - and the stainless steel plate is twice as heavy. For strength, there are reinforcements all around. Even our well-known non-binding hinge is heavier.
