

Corn borers won't know which brand of seed you plant. But your banker will.

YieldGard® controls corn borers all season long. That's a fact. But DEKALB brand YieldGard hybrids are only introduced in elite germplasm that's been researched and tested to give you the best possible return. Considering that, which hybrids would you rather bank on next spring?

NEW

DKC 53-32 (YG)

103 RM

Excellent choice for corn on corn, minimum-tillage and no-till / excellent stalk strength / very good seedling vigor and drydown / good resistance to gray leaf spot

DK 618BtY

111 RM

Early flowering with good tolerance to heat stress during grain fill / adaptable to no-till and conservation tillage for early planting / adapted to variable soils and seeding rates

DK 626BtY

112 RM

Adapted to all crop rotations and soil types / performs best at low to medium plant populations / harvest early to maximize yield potential / very good drydown

DK 595BtY

109 RM

Very good drydown and excellent vigor / good for highly productive soils / excellent for early planting and conservation tillage
