**Low Prices  
Mean Ethanol  
Is Great Opportunity**

**Fred Stemme**  
Director Of Communications  
Missouri Corn Growers  
Association (MCGA)

year for corn yet.  
"So, what does that mean? Essentially, we need something major to move the market. A major drought is something that certainly no one likes to hope for, unless if we could export that problem to our neighbors in the southern hemisphere. So we're left with the question of what else could cause a major increase in demand?"

"It's going to take something major to get us out of the current price slump," said Gary Marshall, MCGA CEO. "With a 2 billion bushel surplus, we are probably facing another tough year in 2000."

According to Marshall, "We didn't get here overnight. It took four years of record world corn production to bring us to this point. The Asian flu, of course, didn't help anything, but for the most part exports are up. In fact, we are expecting final numbers for 1999 to say that it was the largest demand

"Ethanol is the obvious answer. A state or federal program which would provide additional production incentives or use requirements is the obvious answer to give our prices the most immediate bump. That's why we'll be asking state and federal lawmakers to give every consideration to this option."

**NOW!  
OPERATE  
CONTINUOUS FLOW  
OR AUTOMATIC BATCH  
WITH THE SAME DRYER!**

- Economically priced
- Fully automatic
- Outstanding efficiency
- High capacity

Here are the dryers for the farmer who has more to do at harvest than just dry grain.

The new CF/AB Series from Farm Fans are designed to allow drying by either CONTINUOUS FLOW or AUTOMATIC BATCH modes.

These dryers are specifically designed for full heat application for combination drying and dryeration. However, when operating AUTOMATIC BATCH, you can also select Dry and Cool application.
