**Everlast Roofing, Inc.** Metal Roofing & Siding

**The Ultimate G-100 Process**  
"The Best"

1. Valspar 10S Finish Coat
2. Epoxy Primer
3. Zinc Phosphate Pretreatment
4. G-100 Zinc Coating
5. Full Hard Steel (80,000 min yield)
6. Heat formed, less paint cracks

**NOTE! It is more important what is under the paint than what you see on top!**

1. One of the best paints, superior acid rain, cracking resistance and color retention
2. Primer coat promotes outstanding top coat adhesion
3. Zinc phosphate pretreatment. This is a very important process - if your current supplier cannot supply you with this or does not know, you should reconsider
4. G-100 Galvanized Most metal roofing has approx 40% less galvanized under the paint G-100 is more galvanized than most unpainted panels
5. Full Hard Anything less than full hard will bend easier, lower snow loads, etc
6. Heat formed Metal is painted before ribs are formed Most paint cracks at bends, heat forming greatly reduces cracks (check metal siding that is installed for 5-10 years)
7. Stronger design, superior strength, more metal per L F
8. Add Everything Together And Price Should Be \$53.37 Per Square \$1.69 Per L F

**OUR SPECIAL PRICE ONLY**  
**\$46.74 PER SQUARE**  
**\$1.48 PER LINEAL FT.**
