BARIDANA ORCHARDGRASS
 Late maturing, very winter hardy. Excellent rust resistance.

Baridana makes a nice dense sward without the typical Orchardgrass 'clumps'. The absence of clumps also makes Baridana a perfect Orchardgrass for pastures. Baridana has shown real high digestibility and protein figures on forage samples. If managed well, it can produce over 7 tons of DM per acre.

KEYSTONE MILLS

CUSTOM MIX PROGRAM
 GIVES YOU
OPTIONS IN FEEDING
 Your Dairy Herd

Call us today for a feeding program built to fit your Dairy Herd and your Production Goals.

For maximum performance and income over feed cost, rations should be balanced to provide the optimum levels of degradable and undegradable protein, nonstructural and structural (fiber) carbohydrate as well as minerals and vitamins. This allows for maximum utilization of the rumen microbes and total ration efficiency. Because you needs may be different from your neighbor's, we adjust the following nutrients and ingredients to fit your needs and goals

• Amino Acids	• Calcium	• Multi-Protein Sources
• Protein	• Phosphorus	• Added Animal Fat
• By-Pass Protein	• Salt	• Rumen Inert Fats
• Energy	• Vitamins & Trace Minerals	• Buffers
• Fiber	• Organic Trace Minerals	• Yeast
		• Zinpro
