Nutra-Flo FOLIAR PLANT FOOD

...the Yield Booster!

Completely Safe, Will Not Burn Plants

Nutra-Flo "foliar plant food" is completely safe for foliar application.

- made from 100% orthophosphate
- chloride-free
- 100% water soluble
- crystal clear, water-white liquid
- low-salt index
- neutral pH

Improves Soybean, Corn & Alfalfa Yields

Research shows foliar feeding boosts maturity, quality and yield. Plants get an immediate source of N-P-K when soil nutrients are unavailable. Large applications of nitrogen, high organic matter, high or low pH, dry conditions, excess moisture, extreme heat or cold can reduce macro or micronutrient availability.

CROP	BENEFITS OF FOLIAR PLANT FOOD	YIELD INCREASE
Soybeans	• Improves and increases pod set • Hastens maturity	Up to 12 bu/A
Corn	• Higher test weight • Drier corn at harvest	Up to 9 bu/A
Alfalfa	• Increased protein quality • Hastens maturity	Up to 4 ton/A

Easy to Apply with Post-Emerge Chemicals

Nutra-Flo foliar plant food can be piggy-backed with most insecticide and herbicide applications. It meets Monsanto's strict compatibility specifications for combining liquid N-P-K with Roundup® Ultra for application on Roundup Ready® soybeans.

Foliar Application Guidelines

CROP	FIRST APPLICATION	SECOND APPLICATION	AMOUNT FOR EACH APPLICATION
Soybeans	4th to 6th leaf trifoliolate	60 to 80% pod set	3 to 6 gals/A
Corn	3 to 5 leaf collar	10 to 15 days before tassel	3 to 6 gals/A
Alfalfa	4 to 6 days after each cutting		3 to 6 gals/A

Lower Costs, Higher Yields

Nutra-Flo foliar plant food costs less. You'll enjoy these other economic benefits when you foliar apply Nutra-Flo plant food:

- Higher profits
- High energy
- Faster maturity
- No application costs when you combine with post-emerge chemicals
- Drier crops at harvest
- Higher protein levels
- Better nutrient uptake
- Increased disease resistance
- More drought resistance
- Increased root growth
