

ALL-NEW STS COMBINES!

THE SINGLE TINE-SEPARATION MODULE IS AT THE HEART OF THE NEW STS COMBINES

- Advanced Harvesting Solutions
- Superior Feeding Performance
- Feed Accelerator
- Integrated Stone Protection

- Auger-Type Flighting
- Three-Step Outer Cage
- All-New Threshing Pads
- Deere Tine Separation
- Short for Feed Accelerator & Stone Trap

FEATURING:
John Deere's
**Revolutionary Single
Tine-Separation Concept**

IN STOCK
Ready for
Inspection

THRESHING & SEPARATING

- A concentric cage throughout the full length of the rotor, the John Deere STS Module features a stair-step design. This gives the crop mat room to expand as it travels through the separator module, reducing the chances for roping and lowering power requirements. The pull-and-release action frees trapped grain in the crop mat, boosting grain savings significantly.
- STS Combines can be equipped with your choice of three concaves
- Austempered carbide iron - an innovative new casting that provides excellent abrasive resistance and durability
- A dual-range separator drive gives you a wide range of speeds to match conditions.

ENGINE

- John Deere POWERTECH® Engine, Power Boost, Power Bulge
- With the STS Combines, you get wide open access to the tine separator rotor, concaves and separator grates.
- Brisk harvesting speeds are just the beginning with a John Deere 50 Series STS Combine
- Plus, there are no daily lube points on the entire machine. In fact, the shortest lube interval is 50 hours.

CLEANING

- The All-New DynoFlo™ Cleaning System
- A new cleaning fan - a single, 12-blade scroll-type design
- With only three settings on the DynoFlo System - (cleaning fan speed, main chaffer and sieve), you can adjust easily from one crop to the next.
