CUSTOM MIX PROGRAM

GIVES YOU OPTIONS IN FEEDING

Your Dairy Herd

Call us today for a feeding program built to fit your Dairy Herd and your Production Goals.

For maximum performance and income over feed cost, rations should be balanced to provide the optimum levels of degradable and undegradable protein, nonstructural and structural (fiber) carbohydrate as well as minerals and vitamins. This allows for maximum utilization of the rumen microbes and total ration efficiency. Because your needs may be different from your neighbor's, we adjust the following nutrients and ingredients to fit your needs and goals.

| | | |
|--|--|---|
| <ul style="list-style-type: none"> • Amino Acids • Protein • By-Pass Protein • Energy • Fiber | <ul style="list-style-type: none"> • Calcium • Phosphorus • Salt • Vitamins & Trace Minerals • Organic Trace Minerals | <ul style="list-style-type: none"> • Multi-Protein Sources • Added Animal Fat • Rumen Inert Fats • Buffers • Yeast • Zinpro |

5 yds = \$ 65
15 yds = \$100
40 yds. = \$175
65 yds = \$200

"I'm impressed with the heavy construction of the Roto Mix mixer and the accuracy of the electronic scale."

- Joe Kauffman, Mill Manager, G&G Feed, Manheim, PA

G&G Feed, a commercial feed mill, needed a way to mix rations better and faster. Some mixes were taking up to 2 hours!

In 1999 the company bought a 420-12 Roto Mix mixer from Lapp's Barn Equipment. Now those rations take only minutes. And according to mill manager Joe Kauffman, "a 1,000 lb. mix for calves gets mixed as well as a full load of 8,000 lbs. for a larger dairy."

G&G specializes in mixing custom dairy rations for dairies with 115 cows and more. They average 200 tons of custom mixes per week. Any given mix can consist of up to 15 different ingredients plus 100 lbs. of molasses per ton.

If you have any questions about how well the Roto Mix mixer can mix feed, call Joe at G&G Feed, Manheim, PA (717) 665-6122. A good time to call Joe is before 9:00 a.m.
