Nutra-Flo FOLIAR PLANT FOOD
...the Yield Booster!

Completely Safe, Will Not Burn Plants
Nutra-Flo "foliar plant food" is completely safe for foliar application.

- made from 100% orthophosphate
- chloride-free
- 100% water soluble
- crystal clear, water-white liquid
- low-salt index
- neutral pH

Improves Soybean, Corn & Alfalfa Yields
Research shows foliar feeding boosts maturity, quality and yield. Plants get an immediate source of N-P-K when soil nutrients are unavailable. Large applications of nitrogen, high organic matter, high or low pH, dry conditions, excess moisture, extreme heat or cold can reduce macro or micronutrient availability.

| CROP | BENEFITS OF FOLIAR PLANT FOOD | YIELD INCREASE |
|----------|--|----------------|
| Soybeans | • Improves and increases pod set • Hastens maturity | Up to 12 bu/A |
| Corn | • Higher test weight • Drier corn at harvest | Up to 9 bu/A |
| Alfalfa | • Increased protein quality • Hastens maturity | Up to 4 ton/A |

Easy to Apply with Post-Emerge Chemicals
Nutra-Flo foliar plant food can be piggy-backed with most insecticide and herbicide applications. It meets Monsanto's strict compatibility specifications for combining liquid N-P-K with Roundup® Ultra for application on Roundup Ready® soybeans.

Foliar Application Guidelines

| CROP | FIRST APPLICATION | SECOND APPLICATION | AMOUNT FOR EACH APPLICATION |
|----------|--------------------------------|-----------------------------|-----------------------------|
| Soybeans | 4th to 6th leaf trifoliolate | 60 to 80% pod set | 3 to 6 gals/A |
| Corn | 3 to 5 leaf collar | 10 to 15 days before tassel | 3 to 6 gals/A |
| Alfalfa | 4 to 6 days after each cutting | | 3 to 6 gals/A |

Lower Costs, Higher Yields
Nutra-Flo foliar plant food costs less. You'll enjoy these other economic benefits when you foliar apply Nutra-Flo plant food:

- Higher profits
- High energy
- Faster maturity
- No application costs when you combine with post-emerge chemicals
- Drier crops at harvest
- Higher protein levels
- Better nutrient uptake
- Increased disease resistance
- More drought resistance
- Increased root growth
