

CF/ AB GRAIN DRYER

FARM FAN I-270

NEW With Show Discounts

NOW! OPERATE CONTINUOUS FLOW OR AUTOMATIC BATCH WITH THE SAME DRYER!

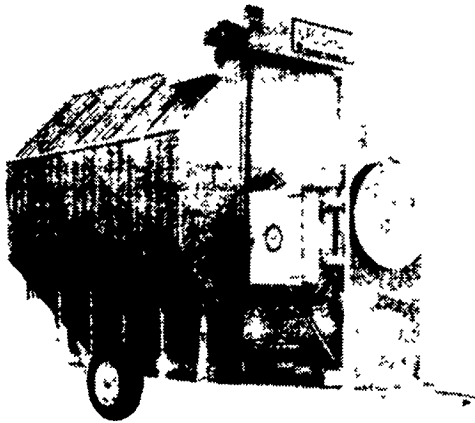

- Economically priced
- Fully automatic
- Outstanding efficiency
- High capacity

Here are the dryers for the farmer who has more to do at harvest time than just dry grain.

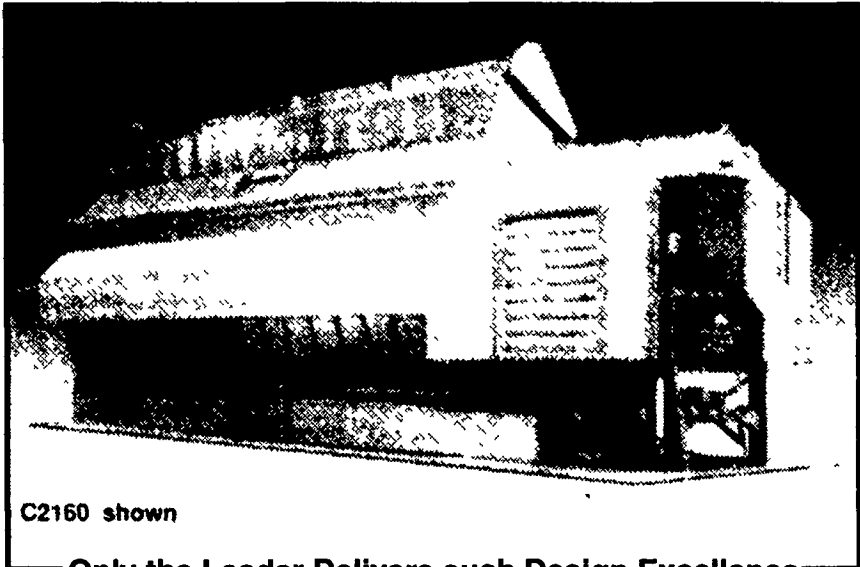

The new CF/AB Series from Farm Fans are designed to allow drying of either CONTINUOUS FLOW or AUTOMATIC BATCH models.

These dryers are specifically designed for full heat application for combination drying and dryeration. However, when operating AUTOMATIC BATCH, you can also select Dry and Cool application.

USDA Solicits Petitions To Amend Substance List In Organic Farming

WASHINGTON, D.C. — The U.S. Department of Agriculture invites interested parties to petition the National Organic Standards Board (NOSB) to amend the proposed National List of Allowed and Prohibited Substances (National List). Petitioners may recommend substances for inclusion on or removal from the National List.

The proposed National List is a part of the March 13, 2000, revised National Organic Program (NOP) proposal. The National List is developed by the NOSB, through consultation with outside experts, and forwarded to the Secretary of Agriculture for approval.

The National List identifies substances that may or may not be used in organic production and handling operations. Specifically, the National List identifies those synthetic substances that may be used and the non-synthetic substances that cannot be used in organic production and handling. All amendments to the proposed National List of

Allowed and Prohibited Substances will be published in the Federal Register for public comment.

"Anyone may petition the NOSB," said Kathleen Merrigan, administrator of USDA's Agricultural Marketing Service. "Amending the National List should be a continuous process that reflects the latest body of knowledge available to the NOSB."

The NOP, NOSB, and the National List are established under authority of the Organic Foods Production Act of 1990. The act directs USDA to establish national standards governing the marketing of agricultural products as organically produced. The program's primary benefit is assurance to consumers that those products meet a consistent standard, thereby facilitating commerce in fresh and processed organically produced food.

Individuals wishing to submit a petition to amend the proposed National List of Allowed and Prohibited Substances or obtain additional information may contact Robert Pooler at USDA/AMS/TMP/NOP, Room 2510 So., P.O. Box 96456, Washington, D.C. 20090-6456; phone 202-720-3252; fax 202-205-7808 or via e-mail at robert.pooler@usda.gov.

The public comment period for the revised NOP proposal closed June 12, 2000. For more information, please see the program's website at <http://www.ams.usda.gov/nop>
