Grain Market

Summary

St. Joseph, MO

October 11, 2000

Report Supplied By USDA

Daily National Grain Market Summary

Wheat bids continued higher mid-week, strengthened by continued dry weather in southern Plains and export disappointments. Corn bids also gained ground on trade expectations ahead of USDA reports and overnight export sale to Taiwan. Sharp declines were noted in soybean pits due to rapid harvest. Wheat 1 to 2 cents higher. Corn steady to 5 cents higher. Sorghum 2 cents higher. Soybeans 5 to 11 cents lower.

Export sales remain slow this week for wheat and reports that the US lost part of the Algerian wheat tender, boosted bids. Dry weather continues in the southern Plains, despite forecasts for possible moisture this week. Emergence is behind most places due to the late plantings and Oklahoma shows only 31 percent of the crop planted while Kansas is at 49 percent complete.

Corn bids were mostly higher in anticipation for tomorrow's USDA ending stocks report. Most traders expect a cut in stock estimates.

However, active harvest pressure with 50 percent of the crop in bins, limited gains. Taiwan's corn purchase overnight offered strength to bids.

Higher soybean bids yesterday were erased today with lowest declines since August reported. Rapid harvest progress created some profit taking as 58 percent of the crop is out of fields. Lack of fresh export news also weighed on bids.

# POULTRY GUARD™

LITTER AMENDMENT

New Poultry Guard™ Litter Amendment is a unique activated clay that delivers consistent ammonia control without the handling inconvenience associated with other poultry litter treatments.

Unlike these other treatments, Poultry Guard Litter Amendment is easy and convenient to apply and needs no incorporation or activation. Fewer application variables mean more consistent performance. In addition, Poultry Guard can be applied up to five days before bird set, whenever it's convenient for the grower.

## Using Poultry Guard Litter Amendment Is As Simple As...

**A**pply

Simply spread over poultry litter.

- No incorporation
- No moisture activation
- No complicated instructions for heating and ventilation in conjunction with application

**B**ird Set

Poultry Guard can be applied when it's most convenient, up to five days before bird set.

- No application timing headaches between clean out and bird set
- No last minute application after equipment has been lowered

**C**ontrol Ammonia

Poultry Guard will deliver immediate and long-term ammonia control and give birds a healthier growing environment.

- No more dangerously high levels of ammonia to stunt growth

You be the judge! We are confident this litter amendment will improve your poultry and your profits.
