

Northeast Order Uniform Price For October 2000

BOSTON, Mass. — Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price for October 2000 is \$13.32 per hundredweight or \$1.15 per gallon for milk delivered to plants located in Suffolk County, MA (Boston).

The October statistical uniform price is \$13.22 for delivery to plants in New York, NY, and \$13.12 for delivery to plants in

Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks.

Mr. Rasmussen also stated

that the producer price differential (PPD) for October is \$3.30 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis.

The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical

uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA.

The Class prices for milk pooled in October are as follows: Class I, \$15.14 (Suffolk County, MA); Class II, \$12.54; Class III, \$10.02; and Class IV, \$11.81. Had the Northeast Order been in effect in 1999, comparable class prices for October 1999 would have been: Class I \$19.79, Class II \$12.50, Class III \$12.48, and Class IV price \$11.83.

The component values for October are protein, \$1.8028 per pound; butterfat, \$1.2444 per pound; other solids, \$0.0471 per pound; and nonfat solids, \$0.8585 per pound.

Milk receipts from producers

totalled 1.895 billion pounds. Class I utilization, milk processed as beverage milk, was 48.5 percent of producer milk receipts. The average Class I utilization, for the three predecessor orders that were combined to form the Northeast Order, was 44.8 percent in October 1999.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 19.7 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 27.3 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 4.5 percent of the total.

HEATMOR OUTDOOR WOOD FURNACE

Stainless Steel

- Heat Home, Hot Water, Outbuildings
- No Fire Danger or Chimney Worries
- Forced Air or Hot Water Heating
- 3 Sizes - 18 Colors
- Forced Draft - Ash Auger Clean-out
- Wood or Coal Grates
- High Efficiency - Clean Burning
- 10 Year Corrosion Warranty
- Financing & Dealerships Available

Outback Heating Dist.
