Cooling more efficient than this would be free...

and you'd live in the arctic.

The most energy-efficient cooling system in the world (excluding the Arctic Circle) can be found in the HiPerForm® Energy Star® refrigeration unit by Mueller®.

The HiPerForm refrigeration process is a proprietary system that floods the entire cooler evaporator using a subcooled liquid refrigerant that keeps your refrigeration at peak efficiency.

The HiPerForm system enables the compressor to operate at cooler temperatures, resulting in longer compressor life, less maintenance, and less energy consumption.

Until you move your operation north, you won't find a more efficient means of cooling your milk.

Mueller is cool.
