# FFA: Amazing Power Within

There is an amazing power within each and every high school student. A student's success is simply a matter of finding that power and putting it to work.

The National FFA is a proactive organization that encourages and assists students in discovering the power they possess. Agricultural education, a supervised agricultural experience and FFA form a solid foundation for students to develop leadership skills, global agricul-

tural knowledge and practical experience needed to succeed in their careers and everyday life.

National FFA Adviser Dr. Larry D. Case said, "FFA takes classroom knowledge and brings it to life and provides many opportunities for members to develop self-confidence, leadership skills and positive values."

From this proud heritage, many people are surprised to discover there are more than 350 careers in the business, science and industry of agriculture. FFA members, from urban, suburban

and rural areas, are preparing for careers in such diverse fields as genetic engineering, marketing, law and communications. The number of agriculture positions is anticipated to expand as countries depend more on the United States for their food, fiber and natural resources requirements.

FFA members from the United States, Puerto Rico, and the Virgin Islands will organize events and activities to build awareness of agricultural education and support during Na-

tional FFA Week, Feb. 17-24. National FFA Week is conducted each year during the week of George Washington's birthday to recognize his leadership and commitment to American agriculture.

Financial support for National FFA Week promotional materials is provided by Case Corporation as a special project of the National FFA Foundation.

This year's theme, "FFA-Discover the Power," illustrates how FFA's programs allow students the opportunity to apply classroom information to real-life situations. Even if students decide not to pursue one of the hundreds of agricultural careers, they benefit from public speaking skills, career experience and leadership skills gained from the FFA.

FFA is a national organization of 453,902 members preparing for leadership and careers in the science, business, and technology of agriculture. Local, state and national programs provide opportunities for students to apply knowledge and skills learned in the classroom.

The organization has 7,220 local chapters located throughout the United States, Puerto Rico, and the Virgin Islands.

FFA's mission is to make a positive difference in the lives of students by developing their potential for premier leadership personal growth and career success through agricultural education.

National FFA online, www.ffa.org, FFA's internet website, can provide information about the National FFA.
